PROFILE SUMMARY

Backend Engineer with 3+ years of experience specializing in building high-scale server-side architectures using Python (Django, FastAPI) and PHP ecosystems. Proven track record of optimizing database performance to reduce query response times by 40–50%. Passionate about clean code, API design, and leveraging robust Python infrastructure to build and scale intelligent, AI-driven backend systems.

SKILLS

Languages & Scripting:- Python, PHP, JavaScript, Node.js, SQL, NoSQL

Frameworks:- Django, FastAPI, Laravel, Express.js, React, Vue

AI Tools & Developer Productivity:- Claude, Claude Code, AI-Assisted Development, Prompt Engineering

Backend & APIs:- RESTful APIs, MVC, ORM (Django ORM, Eloquent), Authentication (JWT, OAuth, Sanctum), Role-based Access Control (RBAC), Web Scraping

Databases:- PostgreSQL, MySQL, MongoDB, SQLite3

Cloud & DevOps:- AWS (S3, CodeCommit), Jenkins (CI/CD), Git, GitHub

Integrations & Services:- Stripe, Razorpay, Twilio (SMS/WhatsApp), Firebase, Third-party SaaS APIs

Advanced Technical Concepts:- Query Optimization, Code Optimization, Caching Strategies

Soft Skills:- Problem-Solving, Collaboration & Teamwork, Technical Project Management

PROFESSIONAL EXPERIENCE

Backend Engineer | NMG Technologies

Sept 2025 - Present

- Engineered the core backend architecture for a golf-based "Fantasy Betting" platform, crafting intricate relational systems to support concurrent user-generated contests, dynamic lineups, and peer-to-peer invitation workflows.
- Designed and implemented a real-time location tracking engine for the "plowpros" navigation system, successfully handling high-frequency geospatial data streams while reducing transmission latency by 30%.
- Developed a fine-tuned leaderboard computation algorithm to track live tournament standings, implementing rapid data aggregation methods to process user scores efficiently under peak traffic conditions.
- Architected and delivered scalable RESTful APIs for the "plowpros" data platform, managing robust data distribution layers across a hybrid MySQL and MongoDB infrastructure.
- Integrated end-to-end subscription monetization and messaging services, deploying Stripe for automated billing cycles and Twilio/Firebase for instant user notifications.
- Streamlined continuous integration and deployment infrastructure utilizing AWS (S3, CodeCommit) and Jenkins pipelines, cutting deployment cycles by 25% through test automation.

Backend Developer | AnuationLabs

Jan 2023 - Aug 2025

- Engineered a custom web scraper and automated data pipeline in Python, accelerating internal data retrieval, business analysis, and reporting speeds.
- Designed and optimized complex database schemas, reducing database query response times by 40–50% and significantly increasing core system performance.
- Built and maintained high-throughput RESTful APIs utilizing Python, Node.js, and PHP to ensure seamless, low-latency frontend-backend synchronization.

- Integrated secure third-party payment gateways (Razorpay) and robust token-based authentication/verification systems.
- Refactored legacy server-side code to enforce modern design patterns, which maximized codebase maintainability and cut production bugs down significantly.

Web Developer Intern | AnuationLabs

Aug 2022 - Dec 2022

- Collaborated with senior engineers to build and maintain PHP/Laravel applications, successfully diagnosing bugs and shipping core micro-features.
 - Wrote and fine-tuned SQL database queries under supervision, improving data retrieval efficiency for internal applications.
 - Debugged server-side logic and client-side scripts while writing comprehensive technical documentation and internal user guides.
-

CERTIFICATIONS

Python Programming Certification | TuteDude (2026)

Focused on Object-Oriented Programming (OOP), advanced data structures, backend automation scripting, and clean code principles.

Full-Stack Web Development Certification | Internshala (2022)

Developed core foundations in web architecture, server-side logic, database management, and frontend integrations.

EDUCATION

Bachelor of Computer Applications (BCA) | IGNOU

2023 - Present

Currently pursuing a degree focused on software development and computing fundamentals.

Diploma in Computer Science | Aditya Institute of Technology

2019 - 2022

Gained a foundational understanding of computer science principles, data structures, and software engineering.
